# Import VPro XP/03 Project into VPro 07

Note: Access 2013 was used to create this document

From the VPro tab select Import/Export – Import – Vpro XP/03 Project

If necessary change file filter to mdb. Select file and click Open.

Select the project to be imported and click Attach.

You will be warned that this is an older version project.

When prompted enter a name for your new project.

VPro07 - New Project

Enter a name for your new project. Preferably, the name must start with a letter, contain no punctuation characters, preferably no spaces, and be less than 40 characters in length

OK

Cancel

GrassLand

Next select or enter the name of the database where you want to store the database. It is best to store new projects in the accdb format.

VPro07

Computer ▸ Local Disk (E:) ▸ Work ▸ Temp

Search Temp

Organize ▾   New folder
